5	Night	195	52081.2	30-Jan-2375			The transcript of Night mentions that Voyager entered the void 53 days before 52081.2, or 8th Dec 2374. This date clashes with the date of the previous episode (Hope and Fear), and most likely 'One' before that too, as 'One' lasted about a month. Those two episodes must have happened in November, which pushes Demon a bit earlier again. Voyager had a very busy period from Sept to Dec..

Voyager Episodes Timeline

Sources of information

in black * Stardates, Production # and Airdates are from Voyager Transcripts from www.chakoteya.net/Voyager
* Chakoteya.net sometimes indicates a stardate at the beginning of the episode web page, which does not appear in the transcript. The source of such stardates is unknown as no character/no logs mention that information in the transcript itself.

in red on yellow background * When Chakoteya.net indicate an unknown stardate, I have used this thread up to, but not including Basics, which (I think) got its info from Voyager VHS tape cases (date of issue unknown): <https://www.trekbbbs.com/threads/chronological-viewing-order-missing-ds9-voy-stardates-found.212584/>
* Where the VHS stardate info comes from is unknown. The DVD cases don't show that info.

Stardate converter

in black * Calendar dates using the stardate converter from <http://www.hillschmidt.de/gbr/sternenzeit.htm>

in red * Where chakoteya.net indicates an unknown stardate and I could not find any other info, I estimated the calendar dates by averaging between the previous and following known dates where possible. In other words, I made it up. Fight me on that one if you are game.

Dating the episodes * The date of each episode does not automatically indicate the start of the episode. Resolutions and the two-parters in particular extend over a long period of time.

Inconsistencies * Specific inconsistencies in episode dates are mentioned in the Comments column.
